

DIPLOMA

This is to certify that

Dagmara Smaga

has completed the Sandvik Coromant Academy programme,

Metal Cutting Technology E-learning

The Metal Cutting Technology program covers the following areas:

- The fundamentals of metal cutting
- All the important aspects of the main application areas
- Choose the right cutting tool for the application
- The basis of production economics
- Improvement of productivity and profitability in workshops
- Definitions of terms and the cutting data formulas
- Optimizing cutting data and tool life
- Recognize different types of tool wear and their remedies
- Solve problems in the metal cutting process
- Feel job satisfaction from better knowledge

The program has been developed by Sandvik Coromant based on needs from production people all over the world.

A handwritten signature in black ink, appearing to read "Nadine Crauwels", with a long, sweeping horizontal line extending to the right.

Nadine Crauwels
President Sandvik Coromant AB

The mission of the Sandvik Coromant Academy is to help our customers to improve their profitability through improved competence in metal cutting technology. Sandvik Coromant Academy is the training organization of Sandvik Coromant. Training programs are carried through at productivity centers all over the world, as well as at customers' premises wherever they are. Metal Cutting Technology is one of a suite of training programs from the Sandvik Coromant Academy.
